Reminders...

There is no limit on the number of pieces per shipment or the total weight of a shipment. However, for each individual package, the following weight and size restrictions apply:

- maximum weight of 150 pounds or 68 kilograms per package
- maximum length of 108 inches or 274 centimetres per package
- maximum total of 165 inches or 419 centimetres for length and girth [(2 x width) + (2 x height)] combined

Items with Special Packaging/Labelling Needs

Batteries

There are many kinds of batteries available today and several are regulated as Dangerous Goods in transportation that may only be shipped by contract shippers within the UPS authorized dangerous goods service area.

Bundled or Strapped Boxes

Only same-sized boxes may be strapped together. Use a minimum of four criss-crossed bands, two in each direction. Put address information on every box. When strapping packages, each box must be strong enough to hold the total weight of the strapped bundle.

Fabric and Wallpaper

Rolled goods travel best when shipped in corrugated boxes. If a fabric roll is shipped in a polybag, make sure the bag is tightly wrapped and taped against the roll to reduce the risk of tearing. Place duplicate labels inside cores or between top layers of material.

Irregularly Shaped Items and Bare Metals

Completely tape down the address label. Do not use “flying tags.” Secure blunt, sharp or protruding edges with taped-on pieces of corrugated cardboard. Protect the surface of the item as needed.

Large or Heavy Packages

For all packages weighing over 70 pounds (31.5 kilograms), a heavy weight sticker is required. Visit [ups.com](https://www.ups.com) or call 1-800-PICK-UPS to order heavy weight stickers.

Tires

Apply a wide band of pressure-sensitive tape through the centre and completely around the body of the tire so the tape is attached to itself. Attach your completed address label to the tape band where it covers the tread. Cover the label with clear tape.

For additional assistance with packaging visit the UPS Packaging Advisor on [ups.com](https://www.ups.com).

Packaging Guidelines

PACKAGE (continued)

Step-by-Step Procedures

1. Use a Corrugated Box

For best results, use a new box that is large enough to allow room for adequate cushioning material on all sides of the contents. If the box has already been used, remove old labels or other shipment markings from the box. Never exceed the maximum gross weight for the box, which is usually printed on the bottom flap.

2. Provide Internal Protection

To properly cushion the contents of your package, wrap each item separately. Fragile articles need to be protected from each other and separated from the corners and sides of the box to prevent damage. Fragile objects require special packaging for safe shipment.

Various materials can be used for cushioning and protection, including:

- Air-encapsulated plastic (bubble wrap)
 - Foam-in-place (a foam sprayed into boxes to form a protective mould around contents)
 - Corrugated dividers
- Use enough cushioning material to ensure that the contents won't move easily if you shake the box.
- ### 3. Close It Securely
- Proper closure is just as important as adequate cushioning. For best results, use one of these types of tape:
- Pressure-sensitive plastic or nylon-reinforced tape that is two or more inches in width.
 - Water-activated paper tape. Use 60-pound grade tape at least three inches wide. Apply three strips to both the top and bottom of the box.
 - Water-activated reinforced tape. (Similar to the plain paper variety with reinforcing fibres that have been added for strength.) This tape requires only two centre seam strips.
- Do not use masking tape, cellophane tape, string or paper overwrap.
- ### 4. Use Proper Labelling
- For fast and efficient delivery, keep these points in mind when addressing your package:
- Always include the receiver's postal code with the complete street address. Include a contact name and telephone number for the receiver.
 - Include the apartment or unit number, if applicable.
 - When addressing to a rural route or international destination, be sure to provide the receiver's telephone number on the label.
 - Labelling can be made easier with the help of a UPS automated shipping solution.

Checklist

- Rigid carton with flaps intact
- Items inside wrapped separately
- Adequate cushioning material
- Strong tape designed for shipping
- No string or paper overwrap
- Single address label
- A clear, complete delivery address
- A clear, complete return address
- Duplicate label inside carton
- UPS bar code label on each package

Determine the Weight and Size

PACKAGE

Within Canada and To and From Destinations Worldwide

Shipping rates are based on the weight and size of the package, as well as origin-to-destination distance.

Billable weight is the weight used to calculate the rate. The billable weight will be the greater of the dimensional weight and the actual weight.

How to Determine Billable Weight

1. Determine Actual Weight.

Determine the actual weight by weighing the package on a scale. Round any fractional weight up to the next whole pound or kilogram.

2. Determine Dimensional Weight.

Dimensional weight reflects package density, which is the amount of space a package occupies in relation to its actual weight.

Determine the package dimensions (length, width, height) in inches for dimensional weight in pounds or centimetres for dimensional weight in kilograms. For each dimension, measure at the longest point, rounding each measurement to the nearest whole

number (for example, 1.00 to 1.49 will be considered 1, and 1.50 to 1.99 will be considered 2).

Multiply the package length by width by height to determine the package's cubic size in inches or centimetres.

Divide the cubic size by 139 when measured in inches or by 5,000 if measured in centimetres to determine the dimensional weight.

Round any fractional weight up to the next whole pound or kilogram.

3. Determine Billable Weight.

Compare the package's actual weight to its dimensional weight. The greater of the two is the billable weight and should be used to calculate the rate.

Determine If Large Package Surcharge Rules Apply:

For domestic and international services, a package is considered a Large Package when its length plus girth [(2 x width) + (2 x height)] combined exceeds 130 inches, (330 centimetres), or for domestic shipments its length

exceeds 96 inches or (244 centimetres). Large Packages are subject to a minimum billable weight of 90 pounds or 41 kilograms. A Large Package Surcharge will also apply. An Additional Handling Fee will not be assessed when a Large Package Surcharge is applied.

For a Multiple-Package Shipment: When measuring in pounds

1. Round any fractional weight up to the next whole pound.
2. Add the packages' weights to find the total weight.

When measuring in kilograms

1. Round any fractional weight up to the next half kilogram.
2. Add the packages' weights to find the total weight.
3. Round this weight up to the next whole kilogram.

Dimensional Weight Calculation

$$\left[\begin{array}{l} \text{Dimensional Weight} \\ \text{in Pounds} \end{array} \right] = \frac{L \times W \times H}{139}$$

L = Length in inches

W = Width in inches

H = Height in inches

$$\left[\begin{array}{l} \text{Dimensional Weight} \\ \text{in Kilograms} \end{array} \right] = \frac{L \times W \times H}{5,000}$$

L = Length in centimetres

W = Width in centimetres

H = Height in centimetres

Packaging Guidelines

UPS WORLDWIDE EXPRESS FREIGHT AND AIR FREIGHT

Preparing Your Freight Shipment

UPS Worldwide Express Freight

UPS Worldwide Express Freight is for palletized shipments of over 150 pounds or 68 kilograms. Pre-authorization is required for all UPS Worldwide Express Freight shipments of over 4,400 pounds or 2,000 kilograms. Maximum pallet dimensions vary by origin and destination. Maximum pallet dimensions by country can be found at [ups.com/assets/resources/media/wwef_max_dim.pdf](https://www.ups.com/assets/resources/media/wwef_max_dim.pdf). For UPS Worldwide Express Freight, scheduling a pickup or drop-off is required on all shipments through a UPS shipping system or [ups.com](https://www.ups.com), or by calling 1-800-PICK-UPS.

Air Freight

Air Freight shipments can include combinations of palletized items or boxes that are too large to ship using other UPS services. Air Freight can also include multiple non-palletized pieces. UPS will accept freight shipments of any weight; however, minimum weight charges apply. Pre-authorization is required for Air Freight shipments that exceed 120 inches in length, 84 inches in width, 76 inches in height or 5,000 pounds in weight or 305 centimetres in length, 213 centimetres in width, 193 centimetres in height or 2,268 kilograms in weight.

Palletized Freight

Palletizing freight helps multiple-piece shipments remain together and provides increased protection from damage. Each pallet, including its contents, is considered one piece.

Non-Palletized Freight

Loose items, such as boxes or containers that have not been secured to a pallet, are considered non-palletized freight. Each loose item is considered one piece and can be shipped via Air Freight services.

Palletizing Your Shipment

UPS Worldwide Express Freight, Air Freight

Pallets are portable rigid platforms used to consolidate shipments and allow for ease of freight movement. Quality pallets are commonly made of either wood* or plastic and can weigh between 20 and 70 pounds or 9 and 32 kilograms. Pallets should be large

enough to accommodate the shipment without overhang. Anything overhanging the pallet edges may be damaged from punctures, abrasions and compression.

UPS Worldwide Express Freight shipments must be palletized, stackable, able to be lifted by forklift,

and shrink wrapped or bonded to the pallet.

For Air Freight shipments, if your non-palletized shipment does not meet the minimum billable weight per piece, consider palletizing prior to UPS pickup.

Step-by-Step

The following are basic step-by-step instructions for palletizing your freight for UPS Worldwide Express Freight and Air Freight.

1. Select Pallets.

- Choose pallets large enough to prevent overhang of shipment pieces.
- Pallets must be sturdy enough to support the load.
 - Select pallets with closely spaced pallet deck boards.
 - Never exceed the rated capacity of your pallet.

Palletizing Your Shipment

1. Select a four-way entry pallet for your freight shipment.

2. Stack boxes in columns. Avoid placing freight beyond pallet edges.

3. Use strapping with stretch wrap to secure boxes to the pallet.

- Do not select pallets with broken boards or protruding nail heads.
- Pallets with four-way forklift entry are preferred as they help to improve handling and reduce the possibility of damage to the shipment.

2. Stack Boxes on Pallet.

For shipments that contain boxes or stackable pieces:

- Ensure cartons are of proper strength to withstand stacking.

*International shipments of pallets made of wood and wood packaging materials in general must comply with ISPM15, "Regulations for Wood Packaging Materials in International Trade." For additional information refer to the International Plant Protection Convention website at www.ippc.int.

Packaging Guidelines

UPS WORLDWIDE EXPRESS FREIGHT AND AIR FREIGHT (continued)

Step-by-Step (continued)

- Securely close, staple and/or seal cartons.
 - Protect product from internal vibration with proper amounts of dunnage within cartons; no void areas/spaces between product or on top of carton.
 - Remove old labels from shipping cartons and product.
 - Affix labels with complete address information for the shipper and the consignee to each piece.
 - Align boxes in columns, corner to corner, for the greatest stacking strength.
 - Avoid interlocking or rotating layer patterns.
 - Do not align corners over the spaces between pallet deck boards.
 - Boxes should not extend past the pallet edges.
 - Do not pyramid the boxes; keep the top layer flat to prevent damage from top loads.
 - Use a slip sheet under the load and every third layer when possible to help distribute the weight evenly and protect the bottom layer.
- 3. Secure Shipment to Pallet.**
- Use a minimum of 60 gauge stretch wrap, five revolutions recommended; tie to pallet and across top to prevent shifting.
 - For Air Freight, label all handling units with shipper/consignee information and PRO #s (label all four vertical sides interior and exterior of the shrink wrapping); use markers if having adhesion issues.
 - To ensure stability, corner boards and banding are recommended.
 - Use three-way locking – nailed corners (not staples) on crates; angle board must extend from the deck board to the top of the pallet load.
 - Insert layers of cardboard between layers of freight to absorb vibration; distribute the weight evenly.
- 4. Label Shipment.**
- For UPS Worldwide Express Freight, label each pallet with a label on each side of the pallet and on top of the pallet with telephone numbers and complete address information, including postal code, of the shipper and the consignee.
 - For Air Freight, label each pallet with telephone numbers and complete address information, including postal code of the shipper and the consignee.
 - Ensure information on the Bill of Lading (BOL) matches the shipment.
 - Indicate the proper location on the BOL and check the contract/tariff for liability limits if excess Declared Value is needed.

Protecting Your Palletized Shipment from Damage

Solution	Description
Corner/Edge Boards	<ul style="list-style-type: none"> – Increases vertical stacking strength, prevents damage to corner edges and stabilizes the load. – Should extend to the full height and length of the load and should be used on all corners.
Strapping or Banding	<ul style="list-style-type: none"> – Prevents pieces from getting lost or separated from the load. – Should be drawn tightly to the load, possibly requiring running it underneath the top deck boards of the pallet.
Stretch Wrapping	<ul style="list-style-type: none"> – Use as an effective way to keep all pieces of a shipment together. – Should first be applied around the pallet and continued upward around the load. – Must be tight to prevent load shifting. – Capture the pallet when wrapping bottom layer. – Designed to stabilize the load, not to secure it to the pallet. – Strapping or banding should be used in conjunction with stretch wrap to secure the load to the pallet.
Top/Bottom Load Protector	<ul style="list-style-type: none"> – Layers of corrugated fibreboard or heavy paperboard. – Use to help evenly distribute the weight of shipments that can be stacked upon one another.

Packaging Guidelines

AIR FREIGHT

Preparing Non-Palletized Freight*

If you do not plan to secure your shipment to pallets, follow the steps below for Air Freight services. UPS Worldwide Express Freight® does not accept non-palletized shipments.

1. Ship freight in corrugated boxes (avoid reusing boxes), crates or shipping containers.
2. Use a container strong enough to support the weight of contents.

3. Use at least 2 inches or 5 centimetres of appropriate cushioning material to protect internal items from each other and the corners, sides, top and bottom of containers. Appropriate cushioning material would include corrugated fibreboard, multiple layers of folded newspaper, styrofoam sheets, packing blankets, etc.

4. Reinforce edges to protect from bending.
5. Securely seal closures and seams with reinforced tape.
6. Label each piece with telephone numbers and complete address information, including postal code, of the shipper and the consignee.

Preparing for Pickup

Pickup is available for all Air Freight services. Your freight pickup request is initiated when you Create a Shipment for freight using WorldShip® and MyFreight, or on [ups.com](https://www.ups.com).

Refer to the "UPS Air Freight Terms and Conditions of Contract for Services in the United States, Canada, and International" at [ups.com/freighttermsofservice](https://www.ups.com/freighttermsofservice) for more

information.

Some Air Freight shipment pickup requests require pre-authorization.

How to Label Air Freight Shipments

Each piece of palletized or non-palletized freight must be clearly marked with telephone numbers and complete address information, including postal code, of the shipper and the consignee. Indicate on freight labels if any pieces require C.O.D. service.

Determine the Weight and Size

UPS WORLDWIDE EXPRESS FREIGHT

To Destinations Worldwide – For Palletized Shipments of Over 150 Pounds or 68 Kilograms

Shipping rates are based on the shipment weight, including the weight and size of the pallet, as well as origin-to-destination distance.

Billable weight is the weight used to calculate the rate. The billable weight will be the greater of the dimensional weight and the actual weight.

How to Determine Billable Weight

1. Determine Actual Weight.

Actual weight is the weight of the items on the pallet and the weight of the pallet, rounded up to the next whole pound or kilogram.

Use a scale to determine the weight. Round any fractional weight up to the next whole pound or kilogram.

2. Determine Dimensional Weight.

Dimensional weight reflects pallet density, which is the amount of space a

pallet occupies in relation to its actual weight. Dimensional weight may apply to all UPS Worldwide Express Freight shipments.

Determine the pallet dimensions (length, width, height) in inches for dimensional weight in pounds or centimetres for dimensional weight in kilograms. For each dimension, measure at the longest point, rounding each measurement to the nearest whole number (for example, 1.00 to 1.49 will be considered 1, and 1.50 to 1.99 will be considered 2).

Multiply the pallet length by the width by the height. The result is the cubic size in inches or centimetres.

For international shipments:

For export and import shipments, divide the cubic size by 139 when

measured in inches or by 5,000 if measured in centimetres to determine the dimensional weight. Round any fractional weight up to the next whole pound or kilogram.

To convert kilograms into pounds, multiply the result by 2.20462. Round any fraction of a pound up to the next whole pound weight rate. To convert pounds into kilograms, multiply the result by 0.453592. Round any fraction of a kilogram up to the next whole kilogram weight rate.

3. Determine Billable Weight.

Compare the pallet's actual weight to its dimensional weight. The greater of the two is the billable weight, which should be used to calculate the rate.

Dimensional Weight Calculation: Canada Export and Import

$$\left[\begin{array}{l} \text{Dimensional Weight} \\ \text{in Pounds} \end{array} \right] = \frac{L \times W \times H}{139}$$

L = Length in inches

W = Width in inches

H = Height in inches

$$\left[\begin{array}{l} \text{Dimensional Weight} \\ \text{in Kilograms} \end{array} \right] = \frac{L \times W \times H}{5,000}$$

L = Length in centimetres

W = Width in centimetres

H = Height in centimetres

For example:

Billable Weight Calculation in Pounds (for multiple-pallet shipments)

For a shipment with three pallets weighing 600 lb, 800 lb and 1,000 lb. All pallets are the same cubic size with the following dimensions: 48 in. x 40 in. x 60 in.

1. Determine Actual Weight.

Actual Weight = 600 lb + 800 lb + 1,000 lb = 2,400 lb

2. Determine Dimensional Weight.

Pallet Dimensional Weight = $\frac{48 \text{ in.} \times 40 \text{ in.} \times 60 \text{ in.}}{139} = 829 \text{ lb}$

Compare the pallet's actual weight to its dimensional weight. The greater of the two is the billable weight, which should be used to calculate the rate.

3. Determine Billable Weight.

Shipment Billable Weight = 829 lb + 829 lb + 1,000 lb = 2,658 lb

For information on how to determine the weight and size for package shipments, refer to [page 8](#).

Determine the Weight and Size

AIR FREIGHT

To Destinations Worldwide – Determine Billable Weight*

Compare the freight shipment's minimum billable weight, actual weight and dimensional weight. The greatest of the three is the billable weight and should be used to calculate the rate.

1. Minimum billable shipment weight.*

- Minimum billable weight for loose items is the greater of 151 pounds/69 kilograms or the number of pieces multiplied by 20 pounds/9 kilograms.

Services	Minimum Weight per Piece	Minimum Weight per Shipment
UPS Next Day Air® Freight, UPS Next Day Air Freight NGS, UPS 2nd Day Air® Freight, UPS 2nd Day Air Freight NGS, UPS 3 Day Freight®, UPS 3 Day Freight NGS	20 pounds/9 kilograms	151 pounds/69 kilograms

2. Determine actual weight and round up any fraction of a pound or kilogram to the next whole pound or kilogram.

3. Determine dimensional weight.

For each dimension, measure at the longest point, rounding each measurement to the nearest whole number. Multiply the shipment length by the width by the height. The result is the cubic size. Divide the cubic size by the dimensional weight factor located in the matrix below to determine the dimensional weight.

Services	Dimensional Weight Factor (Inches/Pounds)	Dimensional Weight Factor (Centimetres/Kilos)
UPS Air Freight Direct®, UPS Air Freight Consolidated®	166	6,000
UPS Next Day Air Freight, UPS Next Day Air Freight NGS, UPS 2nd Day Air Freight, UPS 2nd Day Air Freight NGS, UPS 3 Day Freight, UPS 3 Day Freight NGS	139	5,000

To convert metric measurements into pounds, multiply the result by 2.20462. To convert imperial measurements into kilograms, multiply the result by 0.453592. Increase any fraction to the next whole pound or kilogram.

The chart below provides examples of billable weight calculations in pounds.

* The minimum billable shipment weight applies to all Air Freight services within Canada, to the U.S. and Puerto Rico. For UPS Air Freight Direct and UPS Air Freight Consolidated, a minimum shipment dollar amount is applied. Refer to the "UPS Air Freight Terms and Conditions of Contract for Services in the United States, Canada, and International" at [ups.com/freighttermsofservice](https://www.ups.com/freighttermsofservice) for more information or call 1-800-298-8965.

** The minimum billable weight of 20 pounds per loose piece applies to Air Freight within Canada, to the U.S. and Puerto Rico only. If your non-palletized shipment does not meet the minimum weight of 20 pounds per piece, consider palletizing. Palletizing will ensure your shipment does not fall below the per-piece minimum billable charge.

*** Pallet billable weight is equal to the shipment weight (315 pounds) plus the weight of a pallet (approximately 40 pounds).

Note: Each pallet with its secured contents is entered as one piece.

Customs Brokerage for the Importer

PACKAGE

Information on Import Fees on Shipments into Canada from International Origins

Duties and Taxes

- The Importer of Record is responsible for paying duties and taxes unless otherwise specified at the time of shipment preparation.
- Duties and taxes are determined and applied by the country in which the goods arrive.
- All shipments being imported are subject to inspection by the CBSA or partner government agencies.
- If you are importing goods into Canada from the U.S. or Mexico, ask your supplier to provide the applicable CUSMA Certificate of Origin so the goods will be rated at the lowest possible rate allowed under CUSMA Rules of Origin (if applicable).
- UPS Customs Brokerage can still handle your imports without a UPS Importer Account Number, but all amounts owing on the import (freight charges, duties and taxes,

customs brokerage fees – as applicable) must be paid online prior to delivery* or will be payable C.O.D. when UPS® delivers the imported shipment to your door. In addition, you will be charged an additional I.C.O.D Fee for collecting these import charges upon delivery.

With a UPS Importer Account, all your import charges will be billed directly to your account and no I.C.O.D Fee will apply.

Customs Brokerage Services

- Customs brokers are licensed by the CBSA in customs clearance procedures and are employed to act on the importer's behalf.
- In Canada, the Importer of Record must officially designate a customs broker by signing a General Agency Agreement, giving their customs broker Power of Attorney to act on their behalf. UPS must be selected as the designated customs broker for our guaranteed service to be applicable.

Customs Brokerage Fees

The customs brokerage fees that may apply to a shipment fall into three main categories:

Entry Preparation Fees

This process involves checking the

commercial invoice submitted with the goods and completing entry preparation procedures required by the CBSA, including calculation of the applicable duties and taxes for each type of commodity included in the shipment. A fee may apply for this service.

Disbursement Fees

Customers are responsible for payment of any applicable duties and taxes on their import shipments. When UPS remits payment of duty/tax to the Canada Border Services Agency on behalf of the customer, UPS will invoice the customer for the amount paid and a Disbursement Fee will apply. The applicable Disbursement Fee is the greater of 2.7% of the duty/tax amount

or \$6 on UPS Standard service or \$10 on UPS Worldwide Express Plus, UPS Worldwide Express, UPS Worldwide Express Freight Midday, UPS Worldwide Express Saver and UPS Worldwide Expedited service. To avoid Disbursement Fees, call 1-800-PICK-UPS and ask about our Prepayment or Electronic Funds Transfer (EFT) plans.

Additional Fees

Depending on the shipment and the services required by the customer, various other customs brokerage services and fees may apply. See the Customs Brokerage for the Importer section on [page 115](#) or call 1-800-PICK-UPS for details.

Customs Ancillary Services

- UPS Customs Brokerage offers a number of valuable services for the compliance-conscious importer.
- Contact your UPS Account Executive or call 1-888-520-9090 for more information on the following services:

Duty and Tax Recovery Services

- Duty and Tax Amendment: UPS can file an amendment with the CBSA to correct inaccurate customs-related information on your entry documents. A fee applies for this service.
- Low-Value Shipment Amendment: UPS can correct any customs-related

information on your entry documents for shipments valued at less than \$3,300. The error must be identified on or before the 10th of the month following the import date. If the error is identified after the 10th of the following month, a Duty and Tax Amendment must be completed. A fee applies for this service.

*Access to the UPS Import Fee payment is available to importers enrolled in UPS My Choice® or through UPS tracking on [ups.com](#). Importers may also receive an automatic notification with a link to the payment website.
